

Hi Tara,  
to follow up from your visit to my shop with the  
2x Volt Metro LS bikes.

They are in good order and appear to have only had limited use, they  
would benefit from a thorough service of each bike (to include new cables 2x  
mudguards 1x crank magnet 1x handlebar stem, 2x battery base plates )

Parts cost £260.00

Service Labour £300.00

As these Volt bikes are recent models I am able to supply many parts from stock  
and the rest from Volt Bikes.

Should you require replacement of the locks these are £45 each= £90

The replacement batteries for these bikes are £460.00 each =£920

I estimate the full refurbishment cost for the two bikes @ £1570.00

As discussed I have emailed Volt Bikes to enquire if you are eligible for their  
battery replacement scheme discount.

I will let you know their decision.

Best regards  
Mark Sinclair
